

Herrmann Brain Dominance Instrument HBDI - Workshops

Dom Meli and Peter Barraket attended a Herrmann International Professional Development Workshop on Monday. The one day workshop was designed to refresh and develop facilitation skills in the HBDI Team and Pair Profiles and to help them work in a more whole brain way.

The advantages of using the HBDI Team Profile are:

- It allows team members to ‘understand and value the difference’ each team member brings.
- It allows each team member to understand the value they bring – and when it is required.
- HBDI shows the team how they approach problems, make decisions and how they work together when under pressure.
- Most importantly, it allows the team to access its Collective Intelligence, which is critical to organisational success.

Both Dom and Peter are accredited HBDI practitioners and experienced in running HBDI Team Workshops.

If you would like to understand how your organisation can benefit from whole brain thinking, please call Dom on 02 8006 1173.
