

Whole Brain Leadership - Charts

DOM MELI

Recently we had the pleasure of working with Tracy Ezard who graphically recorded a Whole Brain Leadership Workshop we facilitated for the innovative Wenona School. The bringing together of art, science and education was a potent mix. Thanks to Mark Staker of Wenona that brought us all together.

This week we worked with the Partners of KPMG Private Enterprise on a similar Whole Brain Leadership journey - a very impressive group of people who are looking at cutting-edge ways to lift their value in the market and offer superior service to their clients. We at People At Their Best feel privileged to work with such talented people.

WHAT MEANING DOES THIS

DOM'S SUGGESTION - FLIP THE USUAL

GIVE US?

Does this CHANGE it? Is it EFFECTIVE?

TEAM PROFILE

Is there a RISK of:

- some voices not being heard?
- some people lumbered with the 'implementation' tasks?
- group think?
- not enough CRITICAL ANALYSIS?

LIMBIC SHIFT → to the RIGHT

- increased CONNECTION,
- note impact on others
- ↑ interpersonal

WEIGHTED TO THE RED
